Web of Science Additional Resources Scholarly Metrics Instructions

InCites: Essential Science Indicators:
Once in Essential Science Indicators, https://arch.library.nyu.edu/databases/proxy/nyu01573 you will notice there are quite a few options for tools you can use:

Select from the drop down “Results List” to view the information that best services your needs and follow the submission instructions (including selecting any filters or specifications on types of results you want). Each tool offers different ways to view the results, in some cases this includes the ability to create tables, graphs, or view all “Result List” options in different ways. You can also select the “Field Baselines” or “Citation Thresholds” for more information on the rankings.

Note: You can also select Essential Science Indicators from the Web of Science Core homepage, https://arch.library.nyu.edu/databases/proxy/nyu00731, by clicking on “Essential Science Indicators.”
InCites: Journal Citation Reports (JCR):

At homepage for JCR, https://arch.library.nyu.edu/databases/proxy/NYU02556 select the edition and year of JCR you want to view and if you want to search for a category, specific journal, or many journals and click submit. You also have the option to view information based on Category or Journal by Rank.

Once you have selected the information you wish to view, you can go to a journal or category to create graphs and view more information.

Note: You can also select Journal Citation Reports from the Web of Science Core homepage, https://arch.library.nyu.edu/databases/proxy/NYU00731, by clicking on “Journal Citation Reports”
